#### PREFACE

This report is one in a series on Soviet Ground Force and Logistic installations being prepared for a DIA/CIA Panel. The series is being coordinated, published and disseminated by NPIC. The photographic analysis is being performed by the NPIC Photographic Analysis Group, the CIA Photographic Intelligence Division (NPIC), and the Production Center 1P1c (DIA). The photographic analysis for this particular report was performed by the Production Center 1P1c.

In the interest of uniformity, the titles and letter designators for the facilities observed at these installations are identical with those appearing in the project requirement. When a specific facility is not observed both its title and letter designator are omitted in the report.

Titles and letter designators for the various facilities are as follows: (A) railroad service, (B) road service, (C) landing strips, (D) administrative and troop housing areas, (E) storage areas, (F) ammunition storage areas, (G) POL storage areas, (H) other buildings and facilities, (J) equipment storage/maintenance areas, (K) athletic fields, (L) small arms firing ranges, (M) driver training areas, (N) tank/assault gun firing ranges, (P) flat trajectory firing ranges, (Q) artillery emplacements (batteries), (R) infantry or combined arms field training areas or courses, (S) special training facilities, (T) unidentified facilities or tracking activity.

#### SUMMARY

A road-served military installation covering 95 acres is located on the north side of Goshcha, approximately 33 kilometers (km) east of Rovno (Figure 1).

The installation (Figures 2 and 3) contains two multistory barracks, one barracks, five administration buildings, a vehicle maintenance building, three vehicle storage buildings, four storage buildings, and five support buildings.

A small storage building, probably used as an ammunition burning building, was also observed.

An athletic field and a small arms range were the only training facilities observed.

The installation is active and little change has been noted since [REDACTED] however, improvement in the quality of the photography now shows buildings which are not new but could not be identified earlier.
